

MEMORANDUM

TO: Rosemont Copper Company
FROM: Fennemore Craig, P.C.
DATE: November 30, 2007
RE: Technical Memorandum -- Rosemont Copper Project Unpatented Mining Claims and Sites (Issue No. Admin-3; Item No. 16)

On October 19, 2007, Ms. Jeanine A. Derby, Forest Supervisor, on behalf of Coronado National Forest (“CNF”), sent Rosemont Copper Company (“RCC”) a letter requesting additional information relating to the Rosemont Mine Plan of Operations (“MPO”) (the “Letter”). One particular aspect of the request concerns information relating to the unpatented mining claims and sites associated with the MPO. Specifically, CNF requested that RCC provide information that will provide “[c]larification as to the number of unpatented claims that are associated with this project,” noting that “[p]aragraph 2 of section 1.2 lists 850 unpatented claims while Appendix A lists 864.” In addition, CNF requested that the mining claim list include “claimant information, township range and section, and type of claim,” in addition to BLM serial numbers. The purpose of this Technical Memorandum is to respond to the request specifically identified above.

RCC acquired 850 unpatented mining claims as part of the Rosemont Ranch transaction. Subsequently, and up to the approximate date of submission of the MPO to CNF in early July, 2007, RCC located and filed with BLM additional unpatented mining claims, increasing the number of unpatented mining claims owned by RCC to a total of 864 unpatented mining claims. Subsequent to the submission of the MPO to CNF, and up to the date of the Letter, RCC located and filed with BLM additional unpatented mining claims and sites, increasing total number of unpatented mining claims and sites owned by RCC to 877 as of the date of the Letter. Subsequent to the date of the Letter, and up to the present day, RCC located and filed with BLM additional unpatented mining claims, increasing the total number of unpatented mining claims and sites owned by RCC to 899 at the present day.

Attached please find a table describing the 877 unpatented mining claims and sites owned by RCC as of the date of the Letter (acquired or located and filed with BLM, and presently maintained by RCC). The table is a report generated from BLM’s online Land and Resource Reporting System database (commonly know as the LR2000 system). The table includes the following information: claimant name and address; BLM claim serial number; claim name; county of claim; claim disposition (“A” indicates that claim is active); claim type, last year assessment paid; location date; meridian, township, range and section; and subdivision.

Also, attached please find a table describing the twenty-two (22) unpatented mining claims located and filed with BLM subsequent to the date of the Letter and up to the present day. These particular unpatented mining claims are not included in the BLM generated table noted above because BLM has not yet incorporated them into their online database system (however, we anticipate that BLM will do so in due course). The table includes the following information: claimant name and address; BLM claim serial number; claim name; county of claim; claim disposition (“A” indicates that claim is active); claim type, last year assessment paid; location date; meridian, township, range and section; and subdivision.

Although RCC presently maintains a total of 899 unpatented mining claims and sites as of the present day, RCC may from time-to-time locate certain new unpatented mining claims or sites, or abandon certain existing unpatented mining claims or sites, as determined by RCC in its sole and absolute discretion.

Attachments: Mining Claim Table (from BLM LR2000 database, run date November 30, 2007)
Mining Claim Table (from RCC records)
