Subject: Rosemont Copper Project FEIS Objection

We object to the Rosemont Copper project on Highway 83, Arizona because new information contained in the FEIS became available AFTER posted comment opportunities for this project.

No revised or supplemental DEIS denied the public the opportunity to review and comment on a proper evaluation of all the proposed project's adverse impacts. The CNF chose to issue the FEIS limiting review of the new information through the use of a difficult objection process.

The USFS should rescind this FEIS and create a Revised DEIS.

Sincerely,

Donna Lee and Sam Wright

Donna Lee and The Rev. Sam Wright
