Subject: Re: FW: Gila chub

Hi Ken -

Sorry - I have been swamped trying to leave for Ecuador today - I have 2 specimens of *Gila intermedia* from 3 Apr 2002 from Cienega Creek - I will have to find the original field notes for the exact locality but cannot do this until I return. Catalog number 03-1-1. Locality: UNITED STATES OF AMERICA (USA), Arizona, Pima County: Rincon Peak Quad, Preserve upstream of railroad bridge, deep pool.

You can search the collection directly at - click on collection data:

<http://www.eebweb.arizona.edu/collections/Fishes/fish.htm>

Unfortunately we do not have georeferencing yet.

Peter
