fyi

Speak of the devil...I was out in Box Canyon, south of R-mont this weekend and saw an immature Common Black-hawk point blank. I was at the dam...there was water above and below, but no leofrogs. Said B-hawk was at the pool above the dam, and saw it when I came around the other side of the berm. It didn't let me get a pic but I got a very good look at it. So you can add that sighting to the R-mont BE. I also saw two Golden Eagles around there the time before, if you need me to dig up that record. But I still haven't seen the elusive Green Ratsnake!
