Angela,

no population monitoring has been done this summer or fall - Just water quality. It'll be interesting to see if they over-winter. The water level is very low.

Cheers

Jeff and Jason,

Mike Hatch reminded me that we saw a dead desert pupfish at Ceneguita Ponds during our site visit this summer. Has any monitoring of these populations been conducted since that field visit? Any information that you can provide will be useful in the process of reinitiating consultation.

Thanks,
