The Institute of Transportation Engineers (ITE) is made up of more than 11,000 transportation engineers and planners in over 70 countries. These transportation professionals are responsible for the safe, efficient and environmentally compatible movement of people and goods on streets, highways, and transit systems. For more than 60 years the Institute has been providing transportation professionals with programs and resources to help them meet those responsibilities. Institute programs and resources include handbooks, technical reports, a monthly journal, professional development seminars, local, regional, and international meetings, and other forums for the exchange of opinions, ideas, techniques, and research.

For current information on Institute's programs, please contact:
